

CARDIOPULMONARY RESUSCITATION AND USE OF DEFIBRILLATOR TRAINING (1 DAY) | FORMATION À LA RÉANIMATION CARDIOPULMONAIRE AVEC USAGE DU DÉFIBRILLATEUR (1 JOUR)

Fiche technique

A few minutes are enough for it to be too late in the event of unconsciousness and absence of breathing. This training will teach you how to manage a unconscious casualty whether he/she is breathing or not, and to proceed efficiently with a cardiopulmonary resuscitation with or without a defibrillator. It will also teach you how to position a casualty who is breathing on the side with clear airways.

Training method:

Active pedagogy, scenarios, practical and reflective exercises, exchanges and discussions

Content:

- Essential intervention rules including the call for emergency assistance
- Control of vital functions
- Cardiopulmonary resuscitation of an adult using a defibrillator
- How to place a casualty in a side recovery position

En pratique
